Dimensions (W x H x D):	103 x 37 x 106 mm
Weight:	545 g, without power
	supply

## Accu Box S2 - better sounding analogue!

Accu Box S2 is a clean accu power supply especially for phono products. It has an incredible synergy with all Phono Boxes and turntables (Connectit 18V/15V 2.5-2.1mm required). Using Accu Box S2 on any of our recommended prod-ucts, results in a more homogeneous and spacious sound with better separation and imaging. The sound will come across as more cleaned up overall, giving you a relaxed listening experience with mind numbing sonics. Accu Box S2 uses five cells or rechargeable Li-Ion batteries with a capacity of 2.5Ah. For protection of the batteries Accu Box S2 comes with over-charge, over-discharge and over-current protections, to ensure the maximum life-span of our product. Accu Box S2 also offers a real ground reference for turntables, which kills all possible hum. Furthermore Accu Box S2 also offers a 5V USB A output, for other products, such as DACs.
